

Coming Soon

FAS are accelerating down the development road for the release of Stratus7.

This will lead to a step change in our world renowned Stratus6 software product starting with a complete refresh of the "shop floor" runtime graphical interface giving the end user multi-layered HD graphic capabilities including, dynamic widgets, touch screen and much much more ...

Stratus Explorer will then replace our current test results analysis with a brand new fresh look and feel complete with a user configurable dashboard fed with live data.
